

**How to Use This Document**

This document is intended to summarize changes to the Wellfleet Rx Student Formulary that will go into effect as of 7/1/2021\*. For all other medications not listed below, refer to the January 2021 Student Formulary for information on formulary status.

*\*For Texas and Louisiana plans: State laws in Texas and Louisiana require your plan to cover your medications at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval, these changes will not go into effect until your renewal date.*

**High Cost Generic Updates**

To help students and their providers make informed decisions and drive them towards the lowest cost preferred generic option, some high cost generics are placed in a higher formulary tier and be associated with higher copays. Each high cost generic and the corresponding lower cost generic alternative is reviewed for clinical comparativeness to ensure similar efficacy, clinical indication, and side effect profiles. Listed below are updates to the High Cost Generic Formulary Changes.

**Additions to High Cost Generics List**

Hormonal Deficiency	DOXYCYCLINE IR-DR CAPS
Inflammatory Disease	KETOPROFEN

**Zero Cost Updates**

In addition to the \$0 medications available under ACA preventive requirements, the Wellfleet Rx Student Formulary offers 40+ antibiotic, dermatology, and behavioral health medications at no copay.\*

**Additions to List**

Diabetes	FREESTYLE LIBRE READERS AND SENSORS (Brand)
