Wellfleet is the marketing name used to refer to the insurance and administrative operations of Wellfleet Insurance Company, Wellfleet New York Insurance Company, and Wellfleet Group, LLC. All insurance products are administered or managed by Wellfleet Group, LLC. Product availability is based on regulatory approval and may differ among companies. The Wellfleet Rx Student Formulary is proprietary to Wellfleet Group, LLC and protected by applicable copyright, trademark, and trade secrets laws. Information contained therein may not be published, distributed, or reproduced, in part or whole, without express written consent of Wellfleet Group, LLC.

Wellfleet Rx is a pharmacy solution provided by Wellfleet Group, LLC (Wellfleet). This document represents the efforts of the Wellfleet Rx Pharmacy and Therapeutics (P&T) and Value Assessment Committees, in collaboration with Express Scripts (ESI), to provide physicians and pharmacists with a method to evaluate the safety, efficacy and cost-effectiveness of commercially available drug products. This is accomplished through the auspices of the P&T Committees with input from internal departments at Wellfleet and its Student Health Advisory Board. These committees meet quarterly and more often as warranted to ensure clinical relevancy of the Formulary. To accommodate changes to this document, updates are made accessible as necessary. The P&T Committees use the following criteria in the evaluation of drug selection for the Student Formulary:

- Drug safety profile
- Drug efficacy
- Comparison of relevant therapeutic benefits to current formulary agents of similar use, and to minimize therapeutic duplication where possible
- Cost-effectiveness relative to comparable therapies

As used in this document, the terms defined below have the following meanings.

- “Brand name drug” means a drug that is marketed under a proprietary, trademark-protected name. A brand name drug is listed in this formulary in all CAPITAL letters.
- “Coinsurance” means a percentage of the cost of a covered health care benefit that you pay after you have paid the deductible, if a deductible applies to the health care benefit.
- “Copayment” means a fixed dollar amount that you pay for a covered health care benefit after you have paid the deductible, if a deductible applies to the health care benefit.
- “Deductible” means the amount you pay for covered health care benefits that are subject to the deductible before your health insurer begins to pay. If your health insurance policy has a deductible, it may have either one deductible or separate deductibles for medical benefits and prescription drug benefits. After you pay your deductible, you usually pay only a copayment or coinsurance for covered health care benefits. Your insurance company pays the rest.
- “Drug Tier” means a group of prescription drugs that correspond to a specified cost sharing tier in your health insurance policy. The drug tier in which a prescription drug is placed determines your portion of the cost for the drug.

- “Exception request” means a request for coverage of a non-formulary drug. If you, your designee, or your prescribing health care provider submits a request for coverage of a non-formulary drug, your insurer must cover the non-formulary drug when it is medically necessary for you to take the drug.
- “Exigent circumstances” means when you are suffering from a medical condition that may seriously jeopardize your life, health, or ability to regain maximum function, or when you are undergoing a current course of treatment using a non-formulary drug.
- “Formulary” or “prescription drug list” means the list of drugs that is covered by your health insurance policy under the prescription drug benefit of the policy.
- “Generic drug” means a drug that is the same as its brand name drug equivalent in dosage, strength, effect, how it is taken, quality, safety, and intended use. A generic drug is listed in this formulary in italicized lowercase letters.
- “Medically Necessary” means health care benefits needed to diagnose, treat, or prevent a medical condition or its symptoms and that meet accepted standards of medicine. Health insurance usually does not cover health care benefits that are not medically necessary.
- “Non-formulary drug” means a prescription drug that is not listed on this formulary.
- “Out-of-pocket costs” means your expenses for health care benefits that aren’t reimbursed by your health insurance. Out-of-pocket costs include deductibles, copayments, and coinsurance for covered health care benefits, plus all costs for health care benefits that are not covered.
- “Prescribing provider” means a health care provider who can write a prescription for a drug to diagnose, treat, or prevent a medical condition.
- “Prescription” means an oral, written, or electronic order from a prescribing provider authorizing a prescription drug to be provided to a specific individual.
- “Prescription drug” means a drug that by law requires a prescription.
- “Prior Authorization” means a decision by your health insurer that a health care benefit is medically necessary for you. If a prescription drug is subject to prior authorization in this formulary, your prescribing provider must request approval from your health insurer to cover the drug before you fill your prescription. Your health insurer must grant a prior authorization request when it is medically necessary for you to take the drug.
- “Step therapy” means a specific sequence in which prescription drugs for a particular medical condition must be tried. If a drug is subject to step therapy in this formulary, you may have to try one or more other drugs before your health insurance policy will cover that drug for your medical condition. If your prescribing provider submits a request for an exception to the step therapy

requirement, your health insurer must grant the request when it is medically necessary for you to take the drug.

How to Use the Formulary

The Formulary is a list of medications available to Wellfleet Rx members under their pharmacy benefit. All drugs are listed by their generic names or most common proprietary (branded) name. Any drugs not found in this formulary listing or any formulary updates published by Wellfleet Rx are considered non-formulary drugs and require prior authorization.

All drugs are listed in each category in alphabetical order by generic or brand name. If the generic drug is FDA approved, it will appear *italicized* in the formulary listing. Covered brand drugs appear in CAPITALIZED font. See the table below for an example of this formatting:

ANTINEOPLASTIC & IMMUNOSUPPRESSANT DRUGS		
ABECMA INTRAVENOUS SUSPENSION 300X10EXP6 TO 460X10EXP6 CELL	3	PA; SP
<i>abiraterone oral tablet 250 mg, 500 mg</i>	1	SP; Och; QL

Some drugs on the formulary have certain process requirements or limitations for coverage. These are denoted by:

Symbol	Name	Description
Age	Age Edit	Drug may not be recommended for some patients based on age.
OCh	Oral Chemotherapy	Drug subject to a maximum cost sharing amount of \$250.
PA	Prior Authorization	Requires your doctor to request prior authorization to support use of this drug.
QL	Quantity Limit	Coverage may be limited to specific quantities per prescription and/or time period.
Specialty	Specialty Medications	Subject to Specialty tier Copay. Pharmaceutical, biotech or biological drugs that are used in the management of chronic, orphan or rare

Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations an individual member may have. Many members have specific benefit inclusions, exclusions, or a lack of coverage, which are not reflected in the Formulary. For example, drugs for the treatment of infertility may not be covered. Refer to your benefit summary for more information regarding your specific coverage.

Medications covered under the plan are subject to copay or coinsurance depending on the specific benefit design, type of medication and tier of the medication. Each plan is divided into a 3 Tier copay structure and has a separate copay for Specialty medications. Below is a table divided by plans in the state of California that lists specific copays. Tier 1 medications are preferred formulary generic medications, Tier 2 medications are preferred formulary brand medications and high cost generics, and Tier 3 medications are non-preferred formulary brand and generic as well as excluded.

The Patient Protection and Affordable Care Act (PPACA), commonly known as health care reform, was signed into federal law in 2010. The PPACA established a package of items and services known as essential health benefits, which includes preventative services and medications. As of 2014, certain health plans are required to cover recommended preventive services and medications without charging a copayment, coinsurance or deductible. Wellfleet Rx has developed a list of medications and coverage criteria to support preventive medication requirements based on the recommendations of the U.S. Preventive Services Task Force (USPSTF) and the Centers for Disease Control and Prevention (CDC) to be covered under the pharmacy benefit. Recommendations from USPSTF and the CDC can occur at any time and health plans have specified timelines to implement these recommendations to be compliant with federal law. Plans that meet the definition of a “grandfathered” plan are not subject to PPACA’s Essential Health Benefit requirements. Under the Affordable Care Act (ACA), plans are required to cover USPSTF preventive recommendations that have an A or B rating. Medications covered under this provision are denoted \$0 in the “Drug Tier” column. Coverage for these medications can be acquired by following the steps below in the section marked “How to obtain a Prescription with Your Benefit.”

For members utilizing disability policies, under California State law, the following equipment and supplies for the management and treatment of insulin-using diabetes, non-insulin using diabetes, and gestational diabetes are required to be covered, as medically necessary: blood glucose monitors and blood glucose strips; blood glucose monitors designed to assist the visually impaired; ketone urine testing strips; lancets and lancet puncture devices; pen delivery systems for the administration of insulin; podiatric devices to prevent or treat diabetes-related complications; insulin syringes; visual aids, excluding eyewear, to assist the visually impaired with proper dosing of insulin. Additionally, the following prescriptions are required to be covered as medically necessary: insulin; prescription medications for the treatment of diabetes; and glucagon. *Specialty medications are marked with an "SP" symbol in the Notes column of the drug list. Specialty medications may be obtained at participating pharmacies that carry them. Note that for oral antineoplastic medications, a copay over \$250 is not permissible per CA state law.

The Formulary applies only to outpatient drugs provided to members and does not apply to medications used in inpatient settings. Medications used in an inpatient setting are usually covered under the medical benefit. If a member has any specific questions regarding their coverage, they should contact Wellfleet at 877.657.5030.

Utilization Management (UM) tools

Depending upon a member's specific benefit, the following topics may apply:

1. Generic Substitution

When available, FDA approved generic drugs must be used in most situations, regardless of the brand name indicated. Members usually have lower copays and or co-insurance when they use generic drugs. This policy is not meant to preclude or supplant any state statutes that may exist. All drugs that are or become available generically are subject to review by the P&T Committee. The P&T Committee approves such multi- source drugs for addition to the MAC list based on the following criteria:

- A multi- source drug product manufactured by at least one (1) nationally marketed company.
- At least one (1) of the generic manufacturer's products must have an "A" rating or the generic product has been determined to be unassociated with efficacy, safety or bioequivalency concerns by the P&T Committee.
- Drug product will be approved for generic substitution by the P&T Committee.

If a member requests a brand name drug instead of an approved generic, the member, based on their coverage, is typically required to pay the difference in cost between the brand and the generic. Doctors can request prior authorization if they determine that there is a medical need for the brand name drug.

2. Medication Request Process

Depending upon plan benefit design, a medication request process may apply as follows:

A. Formulary Drugs

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation, per P&T Committee Prior Authorization guidelines prior to dispensing at a network pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended.

B. Non-Formulary Drug Exceptions

Any drug not found in the Formulary listing, or any Formulary updates published by Wellfleet Rx, shall be considered a Non-Formulary drug. Coverage for non-formulary agents may be applied for in advance. When a member gives a prescription order for a non-formulary drug to a pharmacist, the pharmacist will evaluate the

patient's drug history and contact the physician to determine if there is a reasonable medical need for a non-formulary drug. Each request will be reviewed on an individual patient need basis. Approval will be given if a documented medical need exists. The following basic guidelines are used:

- The use of formulary drugs is contraindicated in the patient.
- The patient has failed an appropriate trial of formulary or related agents.
- The choices available in the formulary are not suited for the present patient care need, and the drug selected is required for patient safety.
- The use of a formulary drug may provoke an underlying condition, which would be detrimental to patient care.

If the request does not meet the guidelines established by the P&T Committees, the request will not be approved, and alternative therapy may be recommended.

C. Obtaining Coverage

Coverage, questions or information regarding the medication request or non-formulary exception process may be obtained by:

- Faxing a completed Prior Authorization Request Form to 877.251.5896.
- Contacting at 877-640-7940 and providing all necessary information requested.

An authorization number, specific for the medical need, will be provided for all approved requests. Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis of medical necessity. Therapy that is deemed medically necessary must be covered pending the submission of supporting clinical evidence and documentation. Prior Authorization is generally not available for drugs that are specifically not covered by benefit design.

For any and all requests, a notice to either the member or a designated representative will be made no later than 72 hours following the receipt of all non-urgent requests and 24 hours following the receipt of an urgent or exigent request. Approved coverage for non-urgent requests must provide coverage for the duration of the prescription including refills. Approved coverage for an urgent or exigent circumstance must provide coverage for the duration of the urgency or exigency. A denied claim may be appealed and additional information about appeal rights and procedures will be provided with coverage documents.

3. Step Therapy Process

Drugs that are listed in the Formulary with associated Step Therapy (ST) require evaluation, per P&T Committee Step Therapy guidelines prior to dispensing at a network pharmacy. Previous claims for pre-requisite drugs will be noted at the time of processing if they are within a certain time frame. If no claims are found a prior authorization request form must be submitted stating all previous therapy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended. Note that a member cannot be required to try previously met steps from previous coverage but may be required to try any pre-requisite medication that has not been previously tried before coverage of a medication is approved.

To obtain coverage for a medication bypassing its step therapy requirements, please refer to the above section (3.C) for step by step instructions on requesting an exception.

4. Quantity Limits

Drugs that are listed in the Formulary with associated Quantity Limits (QL) are subject to those limits. Approval for a quantity of a drug outside of an established QL requires evaluation, per P&T Committee guidelines prior to dispensing at a network pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended.

5. General Items Not Covered on the Formulary

- A. Over the Counter (OTC) medications or their equivalents, unless otherwise specified in the Formulary listing.
- B. Nicotine Smoking Cessation products (i.e., transdermal nicotine, nicotine gum, nicotine inhaler), except as required by ACA.
- C. Drugs specifically listed as not covered.
- D. Any drug products used for cosmetic purposes.
- E. Experimental drug products or any drug product used in an experimental manner.
- F. Replacement of lost or stolen medication.
- G. Non-self-administered injectable drug products unless otherwise specified in the Formulary listing.
- H. Foreign sourced drugs or drugs not approved by the United States Food & Drug Administration.

- I. New drug entities will be excluded for up to 180 days after they become available on the market until a formulary decision is made. Depending on the formulary decision, the new drug entity may be excluded or have additional requirements under the formulary thereafter.

Any drugs not listed in this print formulary are considered not covered by the drug benefit. The P&T and Formulary Committees recognize that not all medical needs can be met with this document and encourage inquiries about alternative therapies.

6. Opioid Medications

1. Opioid Overutilization Prevention – Opioid medications for treatment of pain will be available to Wellfleet members under the following restrictions which are reflective of current State and Federal guidance for prescribing of these agents.
 - a. Maximum Days' Supply for Opioid Prescriptions
 - i. Prescriber Type
 1. General Prescribers – 5-day supply
 2. Dentists – 3-day supply
 3. Oncologists – No limit
 - b. Cumulative Morphine Milligram Equivalents (MME) Limit (all prescriptions in last 120 days included) – Cumulative MME are utilized for calculating the total daily dose of opioids. Monitoring of MME allows clinicians to appropriately adjust prescribed opioid medications and are often used to reduce risk of overdose.
 - i. 90 MME total (and above) will encounter a soft rejection at the pharmacy which can be overridden by a pharmacist (except in the state of Pennsylvania).
 - ii. 120 MME total (and above) will encounter a hard rejection which requires prior authorization to be obtained by the prescriber.
 - c. More than a 5-day supply across all opioid prescriptions within a 60-day period requires prior authorization.
 - d. Quantity limits will be placed on opioid medications at the individual medication level.

8. Pharmacist and Physician Communication

The Formulary is a tool to promote cost-effective prescription drug use. The P&T and Formulary Committees have made every attempt to create a document that meets all therapeutic needs; however, the art of medicine makes this a formidable task.

How to obtain a Prescription with Your Benefit

Prescriptions can be obtained through the all-network pharmacies. To have a prescription filled, you may contact your physician and have them send a new prescription to any network pharmacy or you are able to have a network pharmacy transfer-in any current Prescription by contacting them and providing your current pharmacy's information. To locate an in-network pharmacy, please visit <http://wellfleetrx.com/students/pharmacy-network/>. The listing of in-network pharmacies is updated on a quarterly basis.

In the case of specialty drugs, all available specialty drugs may be filled at a network pharmacy unless the medication is under a limited distribution contract.

Formulary Changes

This formulary must be updated monthly to reflect formulary changes as new brand name and generic medications become available. At those times, medications may be subject to any Utilization Management (UM) tool available as determined by the P&T committee. Additional items that may be subject to change are a drugs inclusion on the formulary, a drug's tier placement on the formulary, and any UM tools that affect a drug on the formulary. The plan usually makes and implements changes to the present formulary on a quarterly basis, but depending on your benefit design, those changes may not impact member coverage until the next plan year renewal. For any formulary changes that may negatively affect members, letters will be mailed at least 90 days prior to the effective date of the changes to inform members about the change to their coverage. Letters will also be mailed to providers at the same time to better facilitate either continued coverage of a medication that is impacted or to provide alternative medication that would be covered by the plan.

A medication that has been previously approved for coverage for a member's medical condition that continues to be prescribed for that medical condition cannot be limited any more than previously limited, nor can coverage be excluded, provided that the medication is appropriately prescribed, safe, and effective for treating the medical condition.

Hypertension, Diabetes, and Cervical Cancer \$0 Drugs

In addition to the ACA Preventive Care medications available at \$0 copay on the formulary, the drug categories listed below are covered at no cost to you. Please refer to the formulary for particular drug products that are covered under the plan in each category and for any Utilization Management techniques that may be applicable.

- Antihypertensive Therapy (High-Blood Pressure Agents) – See page 54
- Blood glucose Monitoring Devices & Supplies – See page 86
- Glucose Elevating Agents – See page 87
- Insulin Syringes and Durable Medical Equipment – See page 87
- Insulin Therapy – See page 88
- Non-Insulin Hypoglycemic Agents – See page 94
- Cervical Cancer Antineoplastics & Immunosuppressant Drugs – See page 17

How can you save money on medications?

Wellfleet Rx aims to help remove cost as a barrier to care as much as possible so you can achieve your health and well-being goals. The following programs may help you reduce your out-of-pocket expenses on important medications.

- **Discounts on non-covered OTC products –**
 - Sometimes prescribers will write a prescription for over-the-counter (OTC) products if they are recommended as part of your treatment. OTC products are generally not covered under the Wellfleet Rx Student Formulary. However, your prescription for an OTC product may be eligible for a discount off the retail price. You should try to obtain a prescription for OTC products you use and present it to the pharmacy to determine if it may be eligible under Wellfleet Rx's discount program.
 - Eligible categories of OTC products may include pain relief, allergy, topical (skin) treatments, vitamins, supplements, laxatives, and more.
- **Wellfleet Rx Copay Assistance Program –**
 - If you have a complex or chronic condition that requires treatment with a high-cost specialty medication, your medication may be eligible for copay assistance from the drug manufacturer. For a full listing of the eligible medications and to determine if your plan is eligible for the program, please review "Copay Assistance Program Drug List and Frequently Asked Questions" document under "Current Wellfleet Rx Formularies" on the [Wellfleet Rx](#) website. If you receive a prescription for one of these medications, a professional from the Copay Assistance Program team will contact you to enroll you in the assistance program so you may receive the medication at little to no cost.
- **Manufacturer assistance programs –**
 - If your plan is not eligible for the Copay Assistance Program (see above), you may still be eligible for manufacturer assistance. Manufacturer assistance is available directly from many drug companies. Services provided range from cost sharing assistance to therapeutic resource pharmacists available to answer clinical questions you may have. [NeedyMeds](#) is a valuable resource that aggregates information on these programs.*

U.S. Preventative Services Task Force A & B Recommendations

The Patient Protection and Affordable Care Act (PPACA) requires that certain health plans cover essential health benefits (EHB) without charging a copayment, coinsurance, or deductible. EHBs include a variety of preventative services and medications and are outlined by US Preventive Services Task Force (USPSTF) recommendations with an A or B rating. Based on the recommendations of USPSTF and the Centers for Disease Control and Prevention (CDC), Wellfleet Rx has identified preventative medications to be covered under the pharmacy benefit and updates this list of medications and coverage criteria as needed.

USPSTF and CDC recommendation updates can occur at any time, and health plans have specified timelines to implement these recommendations in compliance with federal law. Plans that meet the definition of a “grandfathered” plan are not subject to EHB requirements. State specific requirements may vary. Wellfleet Rx will monitor for ACA-related guidance and updates to ensure compliance with all regulations.

Standard EHB Zero Copay Table

All medications, including specified OTC items (e.g., aspirin, contraceptives, folic acid), included on the Wellfleet Rx EHB Zero Copay table are covered at zero copay if the member has a valid prescription; however, some medications are only covered at a zero copay for the population specified (e.g., specified age range). The table below contains the specific drug list contained in the EHB Zero Copay Table.
