Our Lady of the Elms College
Student Formulary – January 2027

Wellfleet Rx is a pharmacy solution provided by Wellfleet Group, LLC (Wellfleet). This document represents the efforts of the Wellfleet Rx Pharmacy and Therapeutics (P&T) and Value Assessment Committees, in collaboration with Express Scripts (ESI), to provide physicians and pharmacists with a method to evaluate the safety, efficacy and cost-effectiveness of commercially available drug products. This is accomplished through the auspices of the P&T Committees with input from internal departments at Wellfleet and its Student Health Advisory Board. These committees meet quarterly and more often as warranted to ensure clinical relevancy of the Formulary. To accommodate changes to this document, updates are made accessible as necessary. The P&T Committees use the following criteria in the evaluation of drug selection for the Student Formulary:

- Drug safety profile
- Drug efficacy
- Comparison of relevant therapeutic benefits to current formulary agents of similar use, and to minimize therapeutic duplication where possible
- Cost-effectiveness relative to comparable therapies

How to Use the Formulary

The Formulary is a list of medications available to Wellfleet Rx members under their pharmacy benefit. All drugs are listed by their generic names or most common proprietary (branded) name. Any drugs not found in this formulary listing or any formulary updates published by Wellfleet Rx are considered non-formulary drugs and require prior authorization. All drugs are listed in each category in alphabetical order by generic or brand name. If the generic drug is FDA approved, it will appear *italicized* in the formulary listing. Covered brand drugs appear in CAPITALIZED font.

Some drugs on the formulary have certain process requirements or limitations for coverage. These are denoted by:

Symbol	Name	Description
AGE	Age Edit	Drug may not be recommended for some patients based on age.
Och	Oral Chemo Drug	Refer to your plan document for oral chemotherapy drug benefits.
PA	Prior Authorization	Requires your doctor to request prior authorization to support use of this drug.

Benefit Coverage and Limitations

This printed Formulary does not provide information regarding the specific coverage and limitations an individual member may have. Many members have specific benefit inclusions, exclusions, copays, or a lack of coverage, which are not reflected in the Formulary. For example, drugs for the treatment of infertility may not be covered. Refer to your benefit summary for more information regarding your specific coverage.

The Formulary applies only to outpatient drugs provided to members and does not apply to medications used in inpatient settings. If a member has any specific questions regarding their coverage, they should contact Wellfleet or Wellfleet Rx at the phone numbers listed on their ID card.

Excluded Agents

As new drugs become available, they will be considered for coverage under the Student Formulary. The plan administrator has the right to decide what drugs are covered and to what extent, as well as the right to modify coverage including the exclusion of any prescription drugs. Please note that prescribing guidelines such as Prior Authorization, Step Therapy, Quantity Limit, etc., may still apply to Formulary Therapeutic Alternatives.

Non-Formulary and Step Therapy Exception Requests

A member (or their appointed representative, prescribing physician, or authorized prescriber) may request a standard/non-urgent or expedited/urgent preservice/prior and current authorization for a drug that is subjected to utilization management tools such as step therapy. To initiate an exception request, contact 877-640-7938. Prior authorization guidelines will be made available to the member, member's authorization representative, prescribing physician and other authorized prescriber upon request.

How to Access Pain Management Alternatives to Opiate Products

Your plan covers medication and non-medication treatments as alternatives to opiate products for pain management. Non-opiate medication alternatives include non-steroidal anti-inflammatory drugs (NSAIDs), muscle relaxants, and topical anesthetics. Depending upon a member's specific benefit, the following topics may apply:

1. Generic Substitution

When available, FDA approved generic drug used in most situations, regardless of the brand name indicated. Members usually have lower copays and or co-insurance when they use generic drugs. This policy is not meant to preclude or supplant any state statues that may exist. All drugs that are or become available generically are subject to review by the P&T Committee. Wellfleet Rx approves such multi- source drugs for addition to the MAC list based on the following criteria:

- A multi- source drug product manufactured by at least one (1) nationally marketed company.
- At least one (1) of the generic manufacturer's products must have an "A" rating or the generic product has been determined to be unassociated with efficacy, safety or bioequivalency concerns by the P&T Committee.
- Drug product will be approved for generic substitution by the P&T Committee.

If a member requests a brand name drug instead of an approved generic, the member, based on their coverage, is typically required to pay the difference in cost between the brand and the generic. Doctors can request prior authorization if they determine that there is a medical need for the brand name drug.

2. Three Tier Benefit

The Formulary may be applied to a three-tier benefit design, where the member shares the cost of prescription drug therapy at three levels of copayment. In most instances, generically available drugs will be covered under the first or lowest copay tier, branded drugs listed on the Formulary will be covered under the second copay tier, and branded drugs not on the Formulary will be covered under the third or highest copay tier. In order to see applicable copays for your plan, navigate to your school landing page located at WellfleetStudent.com and view your summary of benefits.

3. Medication Request Process

Depending upon plan benefit design, a medication request process may apply as follows:

A. Formulary Drugs

Drugs that are listed in the Formulary with associated Prior Authorization (PA) require evaluation, per P&T Committee Prior Authorization guidelines prior to dispensing at a network pharmacy. Each request will be reviewed on an individual patient need basis. If the request does not meet the guidelines established by the P&T Committee, the request will not be approved, and alternative therapy may be recommended.

B. Non-Formulary Drugs

Any drug not found in the Formulary listing, or any Formulary updates published by Wellfleet Rx, shall be considered a Non-Formulary drug. Coverage for non-formulary agents may be applied for in advance. When a member gives a prescription order for a non-formulary drug to a pharmacist, the pharmacist will evaluate the patient's drug history and contact the physician to determine if there is a reasonable medical need for a non-formulary drug. Each request will be reviewed on an individual patient need basis. Approval will be given if a documented medical need exists. The following basic guidelines are used:

- The use of formulary drugs is contraindicated in the patient.
- The patient has failed an appropriate trial of formulary or related agents.
- The choices available in the formulary are not suited for the present patient care need, and the drug selected is required for patient safety.
- The use of a formulary drug may provoke an underlying condition, which would be detrimental to patient care.

If the request does not meet the guidelines established by the P&T Committees, the request will not be approved, and alternative therapy may be recommended.

C. Obtaining Coverage

Coverage, questions or information regarding the medication request or formulary process may be obtained by:

- Faxing 877-251-5896 with a completed Prior Authorization Request Form.
- Contacting Wellfleet Rx at 877-640-7938 and providing all necessary information requested.

Wellfleet Rx will provide an authorization number, specific for the medical need, for all approved requests. Non-approved requests may be appealed. The prescriber must provide information to support the appeal on the basis

WELLFLEET®
RX PLAN

January 2027 Student Formulary – Preventive Care Medications with $0 Copay

Updates Effective 1/1/2027

U.S. Preventative Services Task Force A & B Recommendations

The Patient Protection and Affordable Care Act (PPACA) requires that certain health plans cover essential health benefits (EHB) without charging a copayment, coinsurance, or deductible. EHBs include a variety of preventative services and medications and are outlined by US Preventive Services Task Force (USPSTF) recommendations with an A or B rating. Based on the recommendations of USPSTF and the Centers for Disease Control and Prevention (CDC), Wellfleet Rx has identified preventative medications to be covered under the pharmacy benefit and updates this list of medications and coverage criteria as needed.

USPSTF and CDC recommendation updates can occur at any time, and health plans have specified timelines to implement these recommendations in compliance with federal law. Plans that meet the definition of a "grandfathered" plan are not subject to EHB requirements. State specific requirements may vary. Wellfleet Rx will monitor for ACA-related guidance and updates to ensure compliance with all regulations.

Standard EHB Zero Copay Table

All medications, including specified OTC items (e.g., aspirin, folic acid), included on the Wellfleet Rx EHB Zero Copay table are covered at zero copay if the member has a valid prescription; however, some medications are only covered at a zero copay for the population specified (e.g., specified age range).
